Welcome to Bharat Aadhaar Seeding Enabler

Currently, this process is primarily carried out using physical request forms and a semi-automated process. In order to facilitate a DBT beneficiary to manage the seeding process seamlessly and be in control of the account to which the benefits shall flow, it has been decided to set up a seeding platform. This shall be the interface between various channels through which Aadhaar seeding requests can be raised, NPCI mapper, and the banks. Definition Aadhaar linking: Linking Aadhaar number to an account number. The customer can link their Aadhaar number to multiple bank accounts. Aadhaar seeding: Seeding is the process by which the bank will update the Aadhaar number in the NPCI mapper. Seeding is done only with the express consent (written or in electronic form) of the customer
